REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a steering angle detection device having first and second resolvers that detection the rotation angle of the shaft of the steering wheel; a third resolver detecting the rotation angle of the output shaft of an electric motor; a unit for calculating a steering wheel shaft rotation angle that is based upon the signals from the first and second resolvers; a differential calculation unit that calculates first and second derivatives of the rotation angle of the electric motor output shaft with respect to the steering wheel shaft rotation angle during rotation of the steering wheel shaft; a steering wheel shaft rotation number calculation unit that derives a rotation direction and number of the steering wheel shaft from a neutral position based on the first derivative and a positive-negative sign of the second derivative; and a steering angle calculation unit that calculates the steering angle of the steering wheel based on the rotation difference and number of the steering wheel shaft from the neutral position and the steering wheel shaft rotation angle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
